

# Plan of Modules\* Master Nanosciences (120 credits)

Last updated: 2021

## Major in Biology (36 - 48 credits) / Minor in Chemistry or Physics (12 - 24 credits)

1. Sem.	Biology Mastermodule 12 credits	Biology Mastermodule 12 credits		Depending on chosen Minor subject:  12 - 24 credits from chemistry or physics modules	>= 60 credits from the module phase in semester 1 & 2 from Major + Minor
2. Sem.	Biology Mastermodule 12 credits	Specialization lecture (Mastermodule without Seminar or practical) 4 credits			
3. Sem.	Professional Specialization 1** 6 credits	Professional Specialization 2** 6 credits	Research Course practical or theoretical thesis preparation 18 credits		
4. Sem.	Masterthesis in Biology 6 months incl. Writing 30 credits				

### Explanations:

\* Non-binding overview. The underlying examination regulations are binding.

\*\* Professional specializations 1 & 2 have to be carried out in two different workgroups

Modules of choice - distributed through official selections in october and january	Working phase in Biology workgroups of choice	Minor subject
